

ADITYA KUMAR MAURYA

aditya.maurya.1003@gmail.com ** +91-9310736071 ** [linkedin](#)

Fullstack Engineer with **1.8+** years of experience building Software services using Node.js. Experienced on production systems serving **15M+ users**.

Skill Summary

Languages: JavaScript, Typescript, HTML, CSS

Technologies: NodeJs, ReactJs, NextJs, ExpressJs

Databases: MySQL, PostgreSQL

Distributed Systems: Kafka, Redis, Cron Jobs, Airflow DAGs, AWS

Testing & Monitoring: Jest, Artillery, Postman, Swagger, Datadog, Elastic

Experience

Junior Associate Software Engineer - Unthinkable Solutions LLP

(Jan 2025 - Present)

Insurance Tech Retail Service (Vist Health)

- As part of the **retail tech team**, developed and maintained backend services for **India's high-scale insurance clients** including **Star Health, Aditya Birla Health Insurance, Coversure, and Nhance**.
- Deployed features in a large-scale production environment serving **15M+ active users**, ensuring high availability and fault tolerance.
- Revamped the Star Health rewards platform, contributing to a **2x** increase in user participation.
- Refactored core service modules, reducing API response latency by **~25%** which improves overall system throughput.
- Created multiple scripts to **automate** the process like rewarding points on completing monthly/yearly steps goals.
- Collaborating closely with product and clients teams to deliver customized features rapidly in a fast-changing environment.

Bus Live Tracking Service (Chalo GPS)

- I have worked on multiple microservice in Chalo which includes CRTS, vasudha and homescreen, which provide live tracking details of buses to user coordinates.
- Designed and implemented scalable APIs and **refactored** legacy code following **SOLID Principle** to improve maintainability and performance.
- Integrated Redis for **caching** to reduce response time and efficiency on **read heavy codes**.
- Implemented **unit and integration tests** using Jest to ensure code reliability and stability.
- Implemented feature of **bulk upload** to upload large files in batches and notify users after completion.

Projects

CPCL Audit management system

- Developed a platform for managing large-scale industrial **machine audit** operations systems across multiple facilities.
- Designed a **Role-Based Access Control (RBAC)** system supporting five user roles with granular authorization controls.
- Built an **automated scheduling** engine capable of generating audits based on configurable frequencies of machines.
- Implemented workflow orchestration for audit assignment, escalation management, issue tracking, and resolution.
- Designed APIs and data models for audit reporting, **dashboard analytics**, and **real-time notifications**.

Education

Bachelor of Technology (B.Tech) specialization in Computer Science Engineering

Guru Gobind Singh Indraprastha University : 86.3
